The end users will be shopkeepers. Whenever they will download our app for the first time, an introduction logo of company will appear. They have to allow the access to get their device location (Mandatory) . Without accepting this they won't be able to proceed further.

After that they need to enter their phone no. and put the OTP. After this they will be redirected to the registration page where they need to enter their basic details like Name, Shop Name, Shop Address, Pin code, City and State (will be auto fetched on the basis of Pin Code Entered). Also they need to upload image of proof of their shop (Visiting Card/ Shop Image) This is a mandatory field. They also need to enter the bank account details during registration process itself.

Once they submit the given details and proceed further they will be redirected to the home page of the app where they can see the below mentioned functionalities.

- History
- Summary
- Claim
- Success Codes
- Wallet Balance
- Sliders for banners
- Scanner to verify the dynamic QR code
- Option to enter the code manually

In the left top corner in the options functionality. The option required will be:

- Home
- Profile-
- Account Details
- Contact Info (Where Customer Support No. will be mentioned)
- Logout

The user will verify the coupon codes either manually or by scanning through Scanner only through the app. If he tries to scan the QR through any third party scanner they will be

redirected to the link to download the app. They should not be able to verify the coupon code through any other mode despite the Application.

A gift table will be provided by the client as per which user should be able to claim and the settlement will be done by the client after approving it from the claim report at the vendor dashboard. Also there should be a restriction that no user should be able to claim the amount exceeding ₹20000. There should be a disclaimer at the bottom of the gift table about this limit of ₹20000 and while claiming if the user is trying to exceed this limit.

Users can see their gift table and the points milestone at which they can claim along with the amount they will earn. When they achieve any milestone they can claim and will receive the benefits in the given bank account details once the vendor approves. The same details will be visible at the Claim Report to the vendor while approving any claim to go ahead with the transaction process.

### Dashboard Requirement

Talking about the Vendor Dashboard client should be able to fetch the reports mentioned below:

- Enquiry Details
- Code Verification
- Points report
- Claim Report.
- User Report

Also there should be a column of geo location in Longitude Latitude Format in the code verification report which allows the client to know the location of the user while verifying the coupon codes.

There should be a functionality where the client can review and see the User details in User Report like name, address, phone number, shop image/visiting card the user has uploaded along with the rest of the details he has filled on the registration form.

In the Claim Report The bank details should be visible at the Claim Report to the vendor while approving any claim to go ahead with the transaction process.

This Vendor Dashboard will be available VCQRU's website.
