Tiles Adhesive | Epoxy Grout | Tiles Spacers | Bath Tub

## Product Information

## COPPER

टाईल्स पे टाईल्स एवं फ्लोर टाईल्स लगाने में सक्षम (बेसीक एड्हीसीव)

### Tile on Tile & floor Tile (Basic Adhesive)

**Hiifix Copper** is blended modified cement based tile grey adhesive have high bonding strength, it is mean to be used in new construction. Tile on Tiles can be directly fixed with Hiifix Commercial adhesive without fear of de-bonding. this adhesive is manufactured under stringent quality control procedure to ensure world-class products that have been globally proven and professionally endorsed for years.

#### Feature & Benefits

- Ready to use, needs only mixing with water
- Excellent adhesive, low Shrinkage
- Excellent water resistance characteristics
- Suitable for indoor use
- Sufficiently flexible to accommodate thermal & Physical movements
- Needs no curing and soaking of substrate or tile
- Paking : 20 kgs.

#### Technical Information

- Base Polymer Modified cements material
- Appearance : Cement based grey powder
- Mix ratio : Approx. 3 : 1 (by vol.)
- Open time : Approx 30 Minutes 30 DC.
- Pot life : Approx 30-60 minutes at 30 C.
- Coverage : 40 - 45 sqft/20kg bag at 3 mm thickness.
- 25-30 sqft/20kg bag at 6 mm thickness.
- Trafficable time : 24 hrs (min.)
- Internal Curing time : 3 Days at 30 C

दीवार व बाथरूम की हाईट तक टाईल्स लगाने में सक्षम (मीडियम एड्हीसीव)

### Wall & Bathroom Tile (Medium Adhesive)

**Hiifix Silver** is blended modified cement based tile grey adhesive specially designed for applications like fixing ceramic, Glazed, Vitrified Tiles, small tiles on internal/external horizontal & vertical surfaces This Flexible also has an excellent water resistance ability. **Hiifix Silver** for fixing ceramic tiles like, 8x12, 10x15, 18x12,2x1., 2x2,2x4

#### Feature & Benefits

- Ready to use, needs only mixing with water
- Excellent adhesive, low Shrinkage
- Excellent water resistance characteristics
- Suitable for indoor use
- Sufficiently flexible to accommodate thermal & Physical movements
- Needs no curing and soaking of substrate or tile
- Paking : 20 kgs.

## SILVER

#### Technical Information

- Base Polymer Modified cements material
- Appearance : Cement grey powder
- Mix ratio : Approx. 3 : 1 (by vol.)
- Open time : Approx 30 Minutes at 30 C.
- Pot life : Approx 30-60 minutes at 30 C.
- Coverage : 40 - 45 sqft/20kg bag at 3 mm thickness.
- 25-30 sqft/20kg bag at 6 mm thickness.
- Trafficable time : 24 hrs (min.)
- Internal Curing time : 3 Days at 30 C

## GOLD

बड़ी व एलीवेशन टाईल्स लगाने में सक्षम (हेवी एड्हीसिव)

### Highted wall & Elevation Tile (Heavy Adhesive)

**Hiifix Gold** is blended polymer modified cement based tile grey adhesive specially designed for applications like fixing ceramic, Glazed, Vitrified Tiles, Small granite & wall tiles like 2x2, 2x4, 32x32, 5.5x2.5,6x3 on internal/external horizontal & vertical surface of wall & floor. and for Window jamming (Grey)

#### Feature & Benefits

- Ready to use, needs only mixing with water
- Excellent adhesive, low Shrinkage
- Excellent water resistance characteristics
- Suitable for indoor/outdoor use
- Sufficiently flexible to accommodate thermal & Physical movements
- Needs no curing and soaking of substrate or tile
- Paking : 20 kgs.

#### Technical Information

- Base Polymer Modified cements material
- Appearance : Cement grey powder
- Mix ratio : Approx. 3 : 1 (by vol.)
- Open time : Approx 30 Minutes 30 at C.
- Pot life : Approx 30-60 minutes at 30 C.
- Coverage : 40 - 45 sqft/20kg bag at 3 mm thickness.
- 25-30 sqft/20kg bag at 6 mm thickness.
- Trafficable time : 24 hrs (min.)
- Internal Curing time : 3 Days at 30 C

बड़ी टाईल्स और विंडोजेमिंग, ग्रेनाइट व स्टोन लगाने में सक्षम  
(एक्सट्रा हेवी वाईट एड्हीसिव)

### Stone & heavy Tile (Extra Heavy White Adhesive)

**Hiifix platinum White** cement based white tile adhesive specially designed for applications like fixing non porous stones, granite stones on internal/external horizontal & vertical surfaces. This Flexible adhesive also has an excellent water resistance ability. **Hiifix platinum** is suitable for fixing all types of small granite stone natural stones etc. On new substrate how ever mechanical clamps is recommended for stones fixed at heights of more than 30 feet or place were vibration felt severely. For heavy stone application technical may be consulted & also for big tiles

#### Feature & Benefits

- Ready to use, needs only mixing with water
- Excellent adhesive, low Shrinkage
- Excellent water resistance characteristics
- Suitable for indoor/outdoor use
- Sufficiently flexible to accommodate thermal & Physical movements
- Needs no curing and soaking of substrate or tile
- Paking : 20 kgs.

#### Technical Information

- Base Polymer Modified cements material
- Appearance : Cement white powder
- Mix ratio : Approx. 3 : 1 (by vol.)
- Open time : Approx 30-60 Minutes at 30 C.
- Pot life : Approx 30-60 minutes at 30 C.
- Coverage : 40 - 45 sqft/20kg bag at 3 mm thickness.
- 25-30 sqft/20kg bag at 6 mm thickness.
- Trafficable time : 24 hrs (min.)
- Internal Curing time : 3 Days at 30 C

## PLATINUM WHITE

## WHITE GOLD

बड़ी व एलीवेशन टाईल्स लगाने में सक्षम (हेवी वाईट एड्हीसिव)

### Highted wall & Elevation Tile (Heavy White Adhesive)

**Hiifix White Gold** is blended polymer modified white cement based tile white adhesive specially designed for applications like fixing ceramic, Glazed, Vitrified Tiles, Small granite & wall tiles like 2x2, 2x4, 32x32, 5.5x2.5, 6x3 on internal/external horizontal & vertical surface of wall & floor and for Window jamming ( White)

#### Feature & Benefits

- Ready to use, needs only mixing with water
- Excellent adhesive, low Shrinkage
- Excellent water resistance characteristics
- Suitable for indoor/outdoor use
- Sufficiently flexible to accommodate thermal & Physical movements
- Needs no curing and soaking of substrate or tile
- Paking : 20 kgs.

#### Technical Information

- Base Polymer Modified cements material
- Appearance : Cement White powder
- Mix ratio : Approx. 3 : 1 (by vol.)
- Open time : Approx 30 Minutes 30 at C.
- Pot life : Approx 30-60 minutes at 30 C.
- Coverage : 40 - 45 sqft/20kg bag at 3 mm thickness.
- 25-30 sqft/20kg bag at 6 mm thickness,
- Trafficable time : 24 hrs (min.)
- Internal Curing time : 3 Days at 30 C

दीवार व बाथरूम की हाईट तक टाईल्स लगाने में सक्षम (मीडियम वाईट एड्हीसिव)

### Wall & Bathroom Tile (Medium White Adhesive)

**Hiifix White Silver** is blended modified white cement based tile white adhesive specially designed for applications like fixing ceramic, Glazed, Vitrified Tiles, small tiles on internal/external horizontal & vertical surfaces This Flexible also has an excellent water resistance ability. **Hiifix Silver** for fixing ceramic tiles like, 8x12, 10x15, 18x12,2x1, 2x2, 2x4

#### Feature & Benefits

- Ready to use, needs only mixing with water
- Excellent adhesive, low Shrinkage
- Excellent water resistance characteristics
- Suitable for indoor/outdoor use
- Sufficiently flexible to accommodate thermal & Physical movements
- Needs no curing and soaking of substrate or tile
- Paking : 20 kgs.

#### Technical Information

- Base Polymer Modified cements material
- Appearance : Cement White powder
- Mix ratio : Approx. 3 : 1 (by vol.)
- Open time : Approx 30 Minutes at 30 C.
- Pot life : Approx 30-60 minutes at 30 C.
- Coverage : 40 - 45 sqft/20kg bag at 3 mm thickness.
- 25-30 sqft/20kg bag at 6 mm thickness,
- Trafficable time : 24 hrs (min.)
- Internal Curing time : 3 Days at 30 C

## HII-TITE PRO Max

## HII-TITE PRO Max

Adhesive For Bonds Metal Marble, Granite, Ceramic, Dry Concrete, Plastics, Acrylic Items, Bangles.

HII-TITE PRO Max is a high-strength, two component epoxy adhesive system with longer working time. This system is tailor made where extremely high bond strength and long working time is required. It is used for bonding for various similar and dissimilar materials such as metals, ceramics wood, leather, rubber, marble, glass etc. HII-TITE PRO Max remains unaffected to mild alkalis and acids etc. and it is also non-toxic and insulating, Set of Resin and Hardner.

## Connection Pipe

## Connection Pipe

Pipe fittings, also known as pipe connectors, attach one pipe to another in order to lengthen the run or change the flow direction in a plumbing system. These are used to combine, divert or reduce the flow of the water supply, and they come in a variety of sizes to fit the pipe they will connect.
